I want a
chic-hens
house!

**Don't just be a hen.
Be a chic-hen.**

chic-hens make a complete range of hen houses, runs, nest boxes and accessories to make keeping hens in your own garden **fun & easy**.

We supply hens and advice on all aspects of henkeeping. As well as making hen houses, **chic-hens** make bird houses and bat boxes for all native species.

We also make custom made pet housing.

The chic-hens way

We care about design, quality, local employment, and making products that primarily consider the welfare of the inhabitants whether they are hens, birds, rabbits or dogs. We design and make all our own housing, so custom making a house to suit a larger flock of chickens is not a problem.

Materials and Construction

Our painted hen houses are made from heavy best quality, planned all round, kiln dried timber that is sealed to protect against rot. Painting provides additional protection and our hen houses are available in a choice of 4 standard colours. (Other colours available on request)

Having kept hens for many years and with our back-

ground in design and an eye for the details that make a difference, we know what it takes to make quality hen houses. **chic-hens** houses are designed to allow easy access for egg collection and cleaning, to look well placed in any garden and most importantly they are designed with the welfare of the hens and the environment in mind.

Products

chic-hens large hen houses

are suitable for 6-8 hens and are available with an internal or an external nest box. The nest boxes are positioned to make egg collection easy and detachable to make cleaning of the house easy.

chic-hens small house

is suitable for 2-3 hens. Available with or without a nest box. This hen house suits a small urban garden but sits equally as well in a country garden if you only want a few hens and not so many eggs.

chic-hens painted ark

is a house and a run combined and is suitable for 4-5 hens if they are allowed access to the garden but suitable for 2-3 hens if they are to be confined to the space of the run.

Design Features

Our hen houses are designed with the welfare of the hens in mind, to make egg collection and cleaning easy but also as a beautiful garden feature.

chic-hens houses have:

- Excellent ventilation
- Roosting bars within
- A sliding pophole door
- A detachable ladder
- Comfy nest boxes

Dog House

- Unique sliding door design as used in our hen houses. This feature ensures that the door will not blow off its hinges.
- Insulated for winter.
- Attic space with storage accessed with removable roof.
- Raised so as not to draw in moisture from the ground.
- An attractive feature for your garden.

Bird Houses

Wide range to suit all species made sturdily from tanalised timber and galvanised screws to last for many years. Our more decorative houses are painted and have old reclaimed slates for the roofs.
